# PRODUCTS CATALOGUE

primaSOFT®

more than just paper

# ABOUT US

We are a purely Czech family-owned company founded in 1994, follow up on a long tradition of papermaking industry in the Czech Republic. Currently we are one of the largest manufacturers of industrial paper hygiene and napkins in the Czech Republic. Every year we manage to increase our production capacity. We supply customers not only in our country and Slovakia, but we also export to many European countries. Our team currently consists of 65 employees.

# OUR MISSION

To become a major producer of paper products in Central Europe, which offers quality products and has a respected name. We are working to make our brand synonymous with honest products at an affordable price with excellent customer care.

# COMPANY VALUES

## Pride

We bear a name that within 30 years on the market has become a well-established brand for a trader and paper hygiene products producer.
We value the combination of a strong team, stable background and modern technology that allows us to meet our customers‘ needs perfectly.

## Openness

We are professionals. We are actively interested in the needs and wishes of our customers, business partners, and employees and respond to them. Friendly and open communication helps us to build strong and long-lasting relationships.

## Reliability

The principles of our work are based on politeness, honesty and humility. Credibility is key for us. The joint efforts and diligence of our team turn these words into reality.

## Responsibility

Sustainability is the meaning of existence; it brings hope of a clean and safer life for future generations. This constant commitment to all people and to the planet is the basis of our behaviour, a never-ending inspiration and is reflected in the manufacturing processes and products we bring to market.

primaSOFT®
more than just paper

# SUSTAINABILITY IS NOT JUST A WORD, IT'S OUR LIFE

Thanks to the increased height of the transported pallets, the reduction of the cores in our products and optimized logistics, we reduce $CO_2$ emissions

We produce from 100% pure cellulose coming from certified and approved sources

We eliminate waste to a minimum and put it back into the recycling system

100% of the packaging we use is recyclable. At least 50% of the plastic packaging we use comes from already recycled materials

Also, within the premises of our company we take care of noise and CO2 emissions and the fact that we're succeeding is proved by the satisfied bee colonies on our roof

We regularly work with our team to help plant vegetation and trees

We return rainwater from the whole area of our company back to nature not into the sewer system

We offer a new and design collection of dispensers made entirely from recycled plastics, whose technical design reduces the waste of unused paper hygiene products

# PRODUCT CERTIFICATION

## FOOD CONTACT products certification

we meet the hygiene requirements for products intended to come into contact with food

## FSC (Forest Stewardship Council®)

Značka odpovědného lesnictví
FSC® C173046

is a sustainable forest management certification system that guarantees that products come from responsibly managed forests

## ECO LABEL certification

EU Ecolabel
www.ecolabel.eu
EU Ecolabel: CZ/004/003

is an official and independent EU certification programme that guides the creation of sustainable solutions based on life cycle assessment and the common goal of reducing the environmental impact of the production or consumption of products

## Environmentally friendly product

ENVIRONMENTALLY FRIENDLY PRODUCT
10-13

is the eco-label of the Czech Republic, which helps consumers to choose environmentally friendly products that support sustainable development

## The Czech Quality National Program

ČESKÁ KVALITA

supports high-quality products and services verified by independent organizations. Its goal is to help consumers find trustworthy brands and eliminate those that are not reliable

# LOOKING BACK AT THE PAST – AND AHEAD TO THE NEAR FUTURE

**Your company has invested significantly in development in recent years. What are your current projects and plans?**

Our plans and long-term vision are gradually becoming reality. Recently, we expanded our production halls H2 and H3 almost to their maximum capacity, as further expansion is limited by surrounding land.
This space allows us to install a fully automated production line for Z-Z (V-fold) hand towels. The new technology will increase production capacity and improve efficiency – the line will now be operated by two employees instead of three.

**Are you also planning further development of production capacity?**

Yes. We are starting the construction of a new production hall H4, where a fully automated line for facial tissue handkerchiefs will be launched in June 2026.
At the same time, we are preparing a new administrative building that will provide modern facilities for our employees, including a laboratory, canteen and new office spaces. In 2027–2028 we also plan a complete renovation of the existing administrative building.

**How are you responding to the growing volume of production and logistics?**

With the growth of production and sales, the need for additional logistics capacity is increasing. We are therefore planning a new automated warehouse with a capacity of approximately **5,000–8,000 pallets**. We are currently negotiating with the owners of neighbouring land about its possible purchase, which would allow further expansion of our logistics facilities.

**How has the company's turnover developed in recent years?**

Our company has recorded significant growth over the past five years. Between 2021 and 2025, turnover increased by approximately **€11.5 million**. This confirms that our investments in technology, production and long-term customer relationships are delivering strong results.

**What direction will BM plus take in the coming years?**
Our future development will focus mainly on expanding production in the segments of **industrial rolls and napkins**, where we see steadily growing demand.
Our goal is to strengthen our position in the Czech and Central European markets and assure our partners of stable supply and consistent product quality.

**What message would you like to share with your customers and business partners?**

I would like to thank all our partners for their long-standing cooperation and trust. We truly value these relationships.
We believe you will continue to turn to us in the future and remain satisfied not only with the quality of our products but also with the level of service we provide.

# DON'T BE FOOLED, READ THE LABEL CAREFULLY!

Probably, as in all sectors of production and trade, so in ours, there are not only honest producers, although we would all like to be so in the context of equal competition. Many manufacturers and distributors intentionally mislead their customers and the labelling of products is incomplete, incorrect or confusing.

On our label you will find everything you need to weigh or measure the product. Simply so you know what you're getting for your money. We are also ready to provide you with product or technical data sheets with all the detailed parameters.

## Example of a dishonest/honest product:

**TP Jumbo 190**

REJECT

any technical information is missing

**TP Jumbo primaSOFT 190**

ACCEPT

product with all necessary technical information

**Napkins 33x33, 100 ks**

REJECT

100 pcs indicated on the packaging
80 pcs in reality

**Napkins primaSOFT 33x33, 100 ks**

ACCEPT

100 pcs indicated on the packaging
100 pcs in reality

**How do you easily find out the weight of a product before it's actually weighted?**

Ask your supplier for this information:
- dimension (for TP roll length in metres and roll width in metres)
- paper weight
- number of layers

**A simple multiplication gives us the total weight.**

Example:
**Our article 010319, TP Jumbo primaSOFT 190, 120 m roll, width 0,09 m, weight 16g/m², layers 2**

1 **CALCULATION ROLL WEIGHT =** 120 * 0,09 * 16 * 2 = 346 g + core approx 10 g

**If you then come to the same or even better result when weighing the roll, the information on the label corresponds to reality.**

2 Knowing the weight, width, number of layers and declared grammage (counting the weight without core

**CALCULATION ROLE LENGTH =** $\frac{346}{2*16*0,09} = 120$

3 Knowing the weight, length, width and number of layers

**CALCULATION OF PAPER WEIGHT PER ROLL =** $\frac{346}{0,09*120} = 32\ g/m^2$ (2x16g/m²)

# PICTOGRAMS – LEGEND
